Others may claim, but Affirmative has the *ONLY* 122 key keyboard with the original 5250 and 3270 layout that works with all of today's modern PC's and Thin Clients

The Affirmative YESboard 122 combines a standard 122-key terminal layout and Personal Computer keys for smooth transitions between PC and terminal emulation sessions.

The YESboard 122 unifies PC and terminal emulation sessions. Too often, PC users engaged in terminal emulation are faced with a dilemma: how to work with 21 missing keys. The traditional 101-key PC keyboard simply lacks the size to incorporate vital terminal functions. As a result, users are forced to memorize awkward key combinations to compensate - slowing productivity and increasing frustration. The YESboard 122 overcomes the problem with an expansive 122-key layout for full terminal functionality. It still connects directly to and is wholly compatible with your PC. Correspnding terminal and PC functions are clearly labeled and color-coded on their respective keys for ease-of-use and smooth transitions between PC and terminal sessions. Each keyboard is durably constructed for reliable, quiet operation.

Full function keyboard. Support of CMD or F keys 1 through 24, SYS RQ, ATTN, PRINT, TEST, RECORD, PLAY HELP, HEX, ERASE INPUT, CLEAR, RESET, QUIT, BACK TAB, NEW LINE, DUP, JUMP, ZOOM, ROLL UP, ROLL DOWN, HOME, RULE, FIELD EXIT, FIELD PLUS, FIELD MINUS.

Industry exclusive USB interface with ATG drivers.

3270 model includes PA1, PA2, PA3, Field Mark, Cursor Select and EraseEOF keys.

Compatible with all Affirmative Thin Clients.

Optional software drivers available for most emulators.

Dual-colored-keyed captions. Terminal and dual usage keys are in black. PC captions are in blue.

Tactile key switches.

Switches tested to 25 million keystrokes.

Available in 104 key.

Models available for virtually any IBM Terminal or Terminal Emulator.
